Education

Siksha O Anusandhan Deemed to be University (SOA) **2023 - ongoing**
B.Tech in CSE with specialization in Data Science ,CGPA-8.80 *Bhubaneswar, Odisha*

Internship Experience

Fastpeer AI **November 2025**
Software Engineer *USA, Remote*

- Gained hands-on experience with SQL, performing database operations, query optimization, and data management tasks.
- Designed and executed SQL queries for data extraction, analysis, and reporting across relational databases.

National Institute of Technology(NIT), Jamshedpur **June-August,2025**
Software Engineering Intern- AdI Bot *AdI Bot*

- Developed an AI-powered mental health chatbot using Python and Flask, enabling emotion-aware, multi-turn conversations for user support.
- Implemented NLP and RAG pipelines (spaCy, NLTK, Hugging Face) for sentiment analysis, intent detection, and context-aware responses.

Technical Projects

AI Research Agent **Ai Agent**

- Built an AI-powered Research Agent using GitHub Copilot, and NVIDIA LLMs to autonomously research user-defined topics and generate structured, comprehensive reports.
- Designed a multi-LLM workflow to gather, analyze, and synthesize information into accurate, well-structured research content using prompt engineering techniques
- Automated report generation by compiling research findings into downloadable documents, significantly reducing manual research time and improving productivity by 75% .

File Nest: Institutional Document Management System **File Nest**

- Extracted and processed text from PDFs and images using Python libraries such as Tesseract OCR, and OpenCV to support document digitization and indexing for the FILENEST system.
- Contributed to the automation of document processing in FILENEST by building OCR pipelines in Python to extract and organize text reducing manual effort and increasing accuracy increasing efficiency by 80%.

DharmaVerse - Sikkim Monastery Virtual Tour- (Hackathon Project) **DharmaVerse**

- Built a web-based platform offering 360° virtual tours, AR overlays, and multilingual narrations to digitally preserve and promote monasteries.
- Developed an AI-powered multilingual travel assistant and chatbot using GenAI and RAG pipelines for context-aware tourist guidance and itinerary recommendations.
- Implemented AI-driven features such as real-time scam detection and local insights to enhance tourist safety, engagement, and overall travel experience.

Technical Skills

Languages: Python, Java, HTML/CSS **Big Data & Databases**: Apache Spark, SQL
Libraries & Frameworks:: Numpy, Pandas, Matplotlib, Seaborn, SpaCY, Scikit learn, Tensor flow
Developer Tools/Platforms: VS Code, Jupiter Notebook, Google Colab, Hugging Face
Soft Skills: Leadership & Teamwork, Communication & collaboration, Public speaking and anchoring
Relevent coursework: Data Structures and Algorithms, Data Analysis, Artificial Intelligence, Machine Learning, AI Agents

Achievements and Certificates

- Certified Agentic AI developer
- Top 10 in SOA Ideathon
- Nirman-4.0 and 5.0 Hackathon Finalist
- TOP 10 in Odisha AI Symposium (Zonal)

Positions of Responsibilities

- Google Developers Group, Bhubaneswar Chapter– Anchor and Content Writer
- Virtual Showreel, ITER– Anchor & Graphics Designer
- Coding Ninjas, ITER Chapter– Graphic Designer and Anchor
- IT Coordinator of the School (2021-2023)
- Arts and Craft, Fashion Designing, Cooking
